Data Scientist and Software Developer
Web Development and Data Science | *Volkeno, Dakar, Senegal*
- I researched on the markets of Ghana, Nigeria and Uganda.
- I successfully built a data dashboard based on requirement and timelines.

EDUCATION

February 2019

Master of Science in Mathematical Sciences (Big Data and Computer Security)
African Institute for Mathematical Sciences, Senegal

June 2017

Bachelor of Science in Mathematical Sciences (Mathematics)
University for Develelopment Studies, Navrongo, Ghana

CERTIFICATIONS

November 2018 – January 2020

Microsoft Professional Program in Data Science
MicroSoft

PROJECTS

April 2020	## Churn prediction of a financial EdTech bot users
	***Udemy Course** | Practical*
	• I successfully built a churn predictor model for properly managing users of a financial education platform users. I also built a dashboard in addition to this. This project won the best prize in DataHack4FI Season country-level finale in Ghana.
January 2020	## Loan defaulter prediction
	***Udemy course** | Practical Assignment*
	• I successfully built a machine learning model to predict potential loan defaulters of a financial institution. This was part of the Capstone project for the Microsoft Professional Program in Data Science.

ACCOLADES _____

August 2019 — First Runner-Up | Zindi Hackathon *- I was a key player of a 3-member team out of over 100 participants to place second in a machine learning hackathon in Kigali, Rwanda.*

July 2019 — Google Grant | Google *- I received a Google grant worth 750 USD to present a poster on my research at the Deep Learning Indaba 2019, Nairobi, Kenya*

July 2019 — Country-Level Winner (Ghana) | DataHack4FI Season 3 *- I was a key data enthusiast of the country-level first-prize winning team of the DataHack4FI Season 3 Innovation Award*

April 2019 — Microsoft Award | Ghana Data Science Summit *\| I was the third best poster presenter at the IndabaX Ghana, 2019 poster presentations*
